Summary

I'm a Computer Science undergraduate with a focus on Artificial Intelligence and Machine Learning, driven by a strong curiosity for how technology can solve real-world problems. I enjoy working with Python and SQL to turn data into meaningful insights and build practical solutions. Through my academic and self-driven projects, I've gained hands-on experience in developing machine learning models and implementing backend logic, always aiming to make systems more efficient and scalable. What excites me most is the process of learning, experimenting, and building—whether it's improving a model, optimizing performance, or exploring new tools in the AI space. I'm particularly interested in creating solutions that are not just technically sound, but also impactful and usable in real-world scenarios. I'm currently looking for opportunities where I can apply my skills, grow as a developer, and contribute to meaningful projects in AI, data, or backend development.

Education

Sethu Institute of Technology

Bachelor of Engineering, Computer Engineering · (June 2022 - May 2026)

St. Mary's Higher Secondary School, Madurai

10TH

St. Mary's Higher Secondary School, Madurai

12TH
