PROFESSIONAL SUMMARY :

I'm a final-year Computer Science student with a focus on AI and Machine Learning, and I've spent the last couple of years doing more than just studying — I've actually built things that work in the real world. One project involved wrangling large-scale geospatial data into clean, reliable pipelines. Another was an AI-powered examination system that helps blind and visually impaired people give exams independently. Python has been my tool of choice throughout — whether I'm processing raw data, managing databases, deploying models, or building dashboards that make sense of it all. I'm looking for a Python Developer role where I can hit the ground running, write code that matters, and keep pushing myself to grow.

SKILLS SUMMARY:

- **Programming:** Python, SQL.
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib.
- **Machine Learning:** Scikit-learn, Model Evaluation, Random Forest.
- **Deep Learning:** PyTorch, TensorFlow (Basics).
- **Generative AI:** RAG, Semantic Search, LLM Integration.
- **Databases:** PostgreSQL, MongoDB.
- **Backend Development:** FastAPI.
- **Dashboarding:** Streamlit, Folium.
- **Tools & Platforms:** Git, GitHub, Google Colab, Hugging Face.
- **Operating Systems:** Windows, Linux (Basic).

PROJECTS :

Geospatial Dark Store Site Selection Engine | Quick Commerce Analytics | Coimbatore Live

Dashboard : dark-store.streamlit.app

- Processed 11GB+ VIIRS rasters and 500K+ OSMnx geometries using memory-safe rasterio sampling and optimized spatial joins across 7 geospatial datasets.
- Built a WMCD model with H3 hexagonal indexing across 807 cells to identify 12 optimal dark store locations using POI density, transit hubs, and road connectivity.
- Validated scoring with a Random Forest Classifier (300 trees, 5-fold CV) and deployed a live Streamlit dashboard with Folium hex-grid maps for real-time stakeholder analysis.

RAG-Powered Portable Knowledge Base - Offline AI Assistant | Hosted on GitHub

- Built a lightweight retrieval-augmented generation (RAG) system combining semantic search with local AI inference for fast, accurate document Q&A.
- Engineered as a self-contained USB solution, enabling offline knowledge access with strong privacy and portability.
- Distributed via GitHub with modular design for easy adoption, showcasing applied LLM integration and product deployment.

EDUCATION:

SETHU INSTITUTE OF TECHNOLOGY

2022 -2026

- B.E. CSE(Artificial Intelligence And Machine Learning)
- CGPA : 8.3 , GPA :8.6

ST.MARY'S HIGHER SECONDARY SCHOOL

2019-2022

- 12TH , 10TH PERCENTAGE : 77% , 76%

CERTIFICATIONS :

- Complete Data Analytics Job Simulation — **Deloitte** via Forage Platform.
- AWS Managed Workflows for Apache Airflow (MWAA) — Cloud Data Workflow Fundamentals.
- SQL Problem Solving — HackerRank Certified.

ACHIEVEMENTS :

- Second Prize — Technical Event, Mepco National Level Symposium.
- Paper Presentation — Sathak Engineering College.
